

Abergavenny – Crickhowell

 DNOA Decision
Signposting

Scheme description

The northern 66 kV ring in Mid Wales is supplied by two 66 kV circuits from Abergavenny. Either circuit is close to becoming overloaded following a FCO. Additionally, forecast demand growth will exacerbate existing voltage regulation issues on the 66 kV network during FCO conditions. Proposed solution is to install a new 132 kV circuit from Rassau to feed a new 132/66 kV BSP to be established near Brecon.

Constraint Season
Winter/Summer

Flexibility Product
Secure

Justification for decision

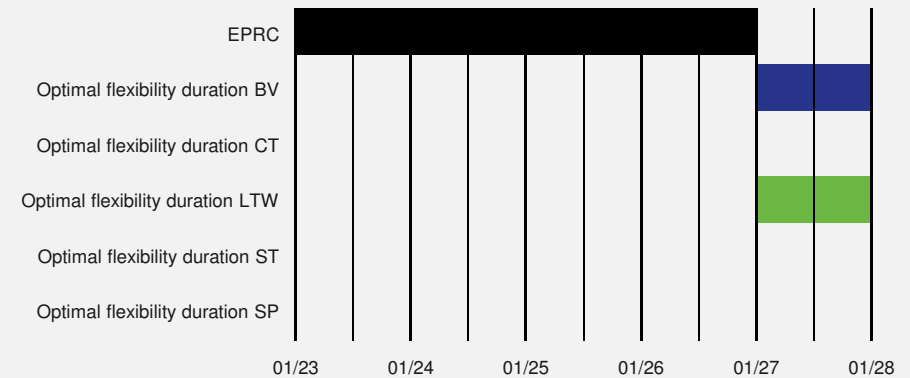

No flexibility requirement under any scenarios until at least 2027.
