

Northampton West BSP

Scheme description

Northampton West BSP has two 132/33 kV GTs and is part of the Northampton group fed from Grendon GSP. For the loss of one of the GTs at Northampton West the full demand is supplied by the remaining GT. Growth projections indicate this demand will overload the remaining GT in the near future. Proposed reinforcement is to install a third GT at Northampton BSP then transfer demand from Northampton West.

Constraint Season
Winter

Flexibility Product
Secure

Justification for decision

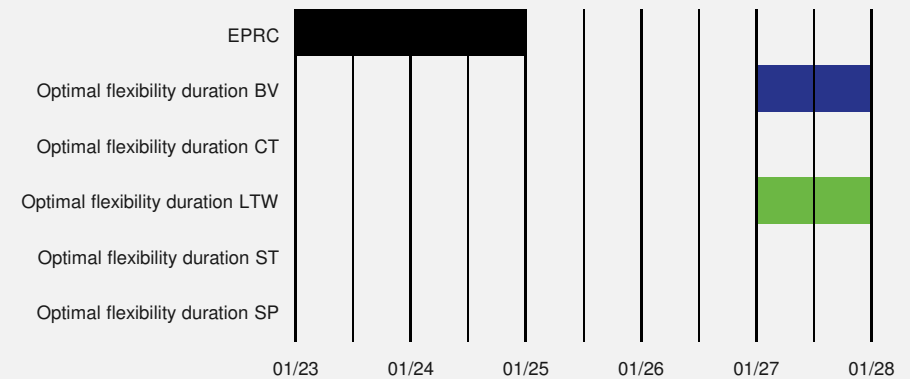

No flexibility requirement under any scenarios until at least 2027.

Constraint management timeline

2023 H1 **Signposting**

Estimated flex utilisation required per year (MWh):

	2023	2024	2025	2026	2027
BV					2.99
CT					
LTW					30.64
ST					
SP
