

Protection

DNOA Decision
Reinforce

Scheme description

In order to safeguard against the impacts of network faults protection equipment is utilised across the distribution network. Schemes which involve installing or replacing existing protection equipment cannot be deferred using flexibility. The following protection schemes are planned on the EHV and 132 kV networks in NGED's four licence areas between now and 2025:

- Bulth Wells
- SD11 Cat Z to Cat A works
